

DUCK ISLAND

COFFEE MANUAL

I ADD WATER

Remove the water reservoir by pulling up on it. We recommend filling it with filtered water from the refrigerator.

II SELECT POD

We have a selection of pods in the bowl next to the machine. The bigger the pod, the larger the volume of coffee you will receive (the very thin pods are for espresso, the very big for large cups of coffee).

III INSERT POD

Gently push up on the lever switch on the front of the machine and it will open. Place the pod inside and gently push down once on the lever switch and it will close automatically. To start brewing, press the button on the top once.

IV CLEAN UP

If the used pod hopper in the back becomes full, please empty it into the trash.

We want our guests to have the best possible experience and earn your **five-star rating**.

If we aren't meeting your expectations please let us know as soon as possible.
